What obstacles did you encounter during the capstone project? Please explain briefly.

*

Initially, I encountered difficulties in creating a growth curve graph that included indicators for stunting, normal, and obesity. However, I managed to complete the graph successfully. A new challenge arose when I attempted to add color fills for the indicator standards. The color fills extended down to the Y-axis ($y = 0$), crossing the indicator lines and causing an unintended visual effect. As a result, I decided not to use color fills for the graph.
